PROJECTS

SongBnB (JavaScript, React, Redux, CSS and PostgreSQL)

[Live Site](#) | [Github](#)

A full-stack single-page Airbnb clone where users can create, edit, and reserve spots, and leave reviews to other's spots.

- Implements core CRUD functionalities of Spots/Bookings/Reviews.
- Includes custom form validation class and modal component for DRY, modular code.
- Utilize react-date-range package to implement a calendar to check availability.
- Designed search and filter function that displays the results based upon the price and location.

Eriscord (Python, Flask, SQL, React, Redux, CSS)

[Live Site](#) | [Github](#)

A full-stack single-page Discord clone where users can create servers and channels, live chat and send direct messages.

- Implements core CRUD functionalities of Servers/Channels/Messages.
- Leverages websockets to render new messages and live chat in real time.
- Integrated React Player with Redux's global store by dispatching actions only when sharing information across components and encapsulating music player data to give the user a seamless, uninterrupted experience.

RobinWhod (Python, Flask, SQL, React, Redux, CSS)

[Live Site](#) | [Github](#)

A full-stack single-page Robinhood clone where users can manage their own portfolios and track the performance of stocks on the market overtime.

- Implements core CRUD functionalities of Assets/Watchlists/Transactions.
- Dynamically generates single stock's price trend and portfolio performance graph Plotly.js.
- Reduced needed PostgreSQL database tables by 25% and heavily DRYed up backend code by utilizing a one-to-many polymorphic table on the database level.
- Integrates with Yahoo Finance api to fetch real time stock's price and trend.
- Integrates with finnhub api to fetch daily company news.
- Integrates with Alphavantage api to fetch company's registration information.
